- ✧ Dr. Tan Keng Tiong, Head, Knowledge Transfer Office 知識轉移處主管陳慶忠博士

The efforts made over the past five years by Dr. Tan, as the Head of Knowledge Transfer (KT) Office, have transformed the approaches and outcomes of KT in the University: from a very limited range of KT functions to a fully-built professional team with patents, licensing, and commercial activities support, with achievements which appealed to the public. Dr. Tan started the Office from ground zero in 2011 and has now successfully established a supportive KT platform for linking faculty members with the community. The number of patents granted and the licensing efficiency have been visibly increased in recent years. With the thoughtful and comprehensive support provided by Dr. Tan and his staff, three professors of the University also won the Gold Medals at the 44th International Invention Exhibition of Geneva last year.

知識轉移處主管陳慶忠博士在過去五年來，致力改革大學知識轉移的方法並提升成果，讓知識轉移處由提供有限範疇的服務，發展至全面而專業的團隊，其中包括為發明申請專利、促進該等發明商業化，並使其成果造福社會。由2011年至今，陳博士從無到有建立知識轉移平台，連繫教學人員與社會，獲批的專利數目及達到專利許可的功效率，近年亦顯著上升。憑藉陳博士及其團隊富心思又全面的支援，三位教授於去年榮獲第44屆日內瓦國際發明展最高榮譽大獎。

## Exemplary Service Award 模範服務獎:

✧ Mr. Chan Chi Leung, Senior Technical Officer (Supervisory), Chinese Medicine - Teaching and Research Division 中醫藥學院教學科研部高級技術主任(主管)陳志良先生

Mr. Chan has overcome a particularly challenging situation when the Research and Development Division of the School of Chinese Medicine faced high staff turnover (including one Laboratory Manager and three other experienced staff) and the suspension of accredited methods of the School's testing laboratory in the middle of 2014. Mr. Chan took up the training of new staff, and the overall management of the laboratory operation and service. In late 2015, two previous accredited methods were successfully replaced by two new ones, and the new tests passed the reassessment of Hong Kong Accreditation Service in 2015 and late 2016.

於2014年年中，陳先生為當時的中醫藥學院研究及開發部應對了別具挑戰性的情況：包括大量人才流失(一位實驗室經理及三位資深員工)，學院實驗室提供的多個認證方法被中止。陳先生為新入職同事提供培訓，並統領實驗室的運作及服務。至2015年年底，開發了兩項新方法以代替兩項早前被中止的認證檢測方法，而該兩項新方法亦於2015年及2016年年底成功通過香港認可處的重新評估。
